Hi There

My questions would be what is the town going to do if the DBIA does not support funding this, and how is this different than the HARP officer that we can call or text for non emergency situations? I did not see much on actionable steps as to how this position would foster better relationships between the parties involved? Would there not be better investments of the money in areas that are at the root of the problems?

I think overall it is a hard ask for this amount required with no proof of outcome, however I understand no proof can be given without putting the program into action. I am unsure.

Thank you,

Julie and The Quinn's Team
