

## **W1 - How the SCCAC can provide input to Council re Council Agenda items that are pertinent to Sustainability &/or the Climate Emergency.**

### **What:**

Support Council and SCCAC's Mandate by providing input to Council re. upcoming Council/COW agenda items that are Sustainability and Climate Change pertinent.

### **Why:**

Councillor Darling requested it at SCCAC's Feb. 25 presentation to TAC, and, it can definitely help in achieving SCCAC's mandate.

### **How:**

SCCAC Member(s) review upcoming Council/COW agendas as early as possible,

- Identify items that are or may be SCCAC pertinent,
- Alert the SCCAC Chair,
- Write a draft recommended input to Council & forward it to the Chair,
- If Chair agrees, Chair requests the Clerk put SCCAC on the upcoming agenda,
- Chair edits/approves the submission and decides if it will be written only or also a delegation
- Usually, there will not be time to wait for the next scheduled SCCAC meeting, so if necessary, how to satisfy current procedures or how to modify procedures will need to be agreed with the Clerk; hopefully doable, in that we are operating under a Climate Emergency, and we are responding to a Councillor request.

**When:** As soon as practical.

### **Who:**

Hopefully a Member will want or be willing to be the 'Lead' on this project.
