

W2 - The criteria to use in scoring/ranking the 'CO2/GHG Impact' column on the Work Plan.

What:

Rank/score SCCAC Work Plan 'Objectives' by their relative impact on Cobourg CO2/GHG emissions if/when the Objective is achieved.

Why:

In combination with considering the time/cost/resources to achieve 'Objectives' (which could also be a Work Plan column) this will be important in prioritizing the Objectives and assigning resources.

How:

With a scoring/ranking system.

Scoring Work Plan 'Objectives' as High/Medium/Low relative impact is subjective-ish but simple as an initial method. A more objective, more sophisticated system may be a later improvement.

When: As soon as practical.

Who:

The 'Lead' on a Work Plan 'Objective', with any associates who are helping, suggest a High/Medium/Low rank for that 'Objective' relative to the other 'Objectives' on the Work Plan.

She/he explains the reasons for the rank at the next SCCAC meeting. Questions, discussion and a vote follow.
