The following Motion was adopted at the Wednesday, May 5, 2021 Sustainability & Climate Change Advisory Committee (SCCAC) Meeting:

Moved by Member W. McCarthy

WHEREAS in December 2019, Cobourg Council officially declared a Climate Emergency, conveying its recognition that we are facing an unprecedented crisis requiring unprecedented climate mitigation measures; and

WHEREAS the need to address the Climate Emergency is ever more urgent as time moves on and additional actions must be implemented; and

WHEREAS global heating is **an emergency of a worse scale than the pandemic**; it will have **way more severe and long lasting consequences**; and

WHEREAS, according to April's 'Scientific American' - "We are living in a Climate Emergency, and we're going to say so. It's time to use a term that more than 13,000 scientists agree is needed. Why "emergency"? Because words matter." - - *Scientific American* has agreed with major news outlets worldwide to start using the term "climate emergency" in its coverage of climate change.
