

**DRAFT INVITATION TO DEREK PAUL OF LAKEFRONT UTILITIES
FOR APPROVAL AT SCEAC MEETING OF JULY 7, 2021**

Dear Mr. Paul

The Sustainability and Climate Emergency Advisory Committee would like to invite you to one of our regular meetings to talk about the role that Lakefront Utilities could play in helping to promote sustainability and reduce greenhouse gas emissions throughout the town of Cobourg. As the provider of both electricity and water services throughout the town, Lakefront Utilities has a unique perspective and unique capabilities for assisting in the above. Some of the topics that we would like to explore with you are as follows:

- Support for additional electric vehicle charging stations,
- Planning for electrical capacity for the coming increase in the use of electric vehicles,
- Promotion of renewable sources of electricity such as
 - solar panels on roofs
 - windmills
- Planning for future storage of electricity generated during low usage times from the above
- Promoting reduction of single use bottled water container usage.

The committee meets on the first Wednesday of every month at 2:00 p.m. Please let us know as to what date and time you would be available to meet with us.

Thank you for your consideration.
